711 West Broadway, Vancouver, BC, V5Z 3Y2**

Join us for a full day of presentation series covering the latest aspects of diabetes therapeutics and clinical care!

Register online at: www.endocrineresearchsociety.com/conferences

For questions, email us at: endocrine.research.society@gmail.com

COURSE DESCRIPTION

This course will provide current and critical information pertaining to the treatment and care of diabetes to individuals primarily responsible for the management of diabetes within their own groups and communities. Diabetes topics that will be discussed in this course include: diabetes in pregnancy, medical management on obesity, retinopathies, T2D prevention, refractory gastroparesis, T1D and mental health support, MODY, and general case studies.

COURSE OBJECTIVES

Upon completion of the program, participants will be able to:

1. Demonstrate sufficient knowledge to effectively communicate the progress of novel diabetes medical knowledge with their patients.
2. Understand the clinical applications of new diabetes technologies and medications.
3. Increase confidence in managing specific diabetes complications and patient subgroups.
