

27th ANNUAL DIABETES DIRECTORS SEMINAR

MAY 14-15 2015

EMPIRE LANDMARK HOTEL
1400 Robson St., Vancouver

Learning Objectives

Overall objectives – upon completion of the seminar, participants will be able to:

- Demonstrate knowledge of current management and treatment options for Type 1 and Type 2 diabetes (ex. insulin and non-insulin therapies, islet cell transplant, diabetes technologies, etc.)
- Describe and apply updated therapeutic/clinical skills for management of diabetes and its complications
- Outline advances from recent research in diabetes care

Session objectives - upon completion of the sessions, participants will be able to:

- Describe existing and new therapeutic uses for GLP-1 agonist therapies
- Review recent advancements towards development of a closed-loop insulin pump-sensor system
- Specify reasons to consider stopping metformin therapy
- Outline the role and potential benefits of bariatric surgery as it relates to diabetes
- Compare blood glucose sensor reviews and determine which ones are accurate
- Describe U300 insulin and how it differs clinically and chemically from existing insulins
- Summarize recent BC PharmaCare cutbacks and their potential impact on patient's diabetes care
