## **COURSE DESCRIPTION**

---

This full-day lecture series offers an interactive case-based review of common endocrine problems encountered in clinical office practice. The conference is open to general practitioners, internists, specialists, trainees, and allied health professionals. A variety of endocrine health topics will be reviewed, such as adrenal, thyroid, pituitary, and gonadal disorders, as well as pediatric endocrinology, hypertension, diabetes and some interesting endocrinology cases.

## **COURSE OBJECTIVES**

---

Upon completion of the program, participants will be able to:

- 1) Describe at least one key endocrine clinical solution, learning point or next step in therapy for each topic presented.
- 2) Be able to demonstrate updated knowledge of new concepts and technology for diagnosis and treatment for endocrine patients encountered in office practice.
- 3) Outline how you may employ these new clinical skills, technology & treatment options for improving your patient's care.
