1600 Evaluations and Adjourn

COURSE DESCRIPTION

This course will review the following endocrine health issues: diabetes mellitus (DM) and medication, thyroid imaging, perimenopause, gynecomastia, case studies of primary hyperparathyroidism, osteoporosis medication, adrenal insufficiency, and the effects of opioids on the pituitary.

COURSE OBJECTIVES

Upon completion of the program, participants will be able to:

1. Identify at least one key endocrine clinical solution, learning point or next step in therapy for each topic and patient scenario presented.
2. Be able to demonstrate updated knowledge of new concepts for diagnosis and treatment guidelines for endocrine problems encountered in office practice.
3. Outline how they may employ these new guidelines, clinical skills, techniques and treatment options for improving their patients' care.

COURSE FACULTY

Dr. Adam White, MD, FRCPC, Clinical Assistant Professor, Division of Endocrinology, University of British Columbia

Dr. Ed Peramaki, MD, CCFP, Clinical Assistant Professor, Department of Radiology, University of British Columbia.

Dr. Benjamin Schroeder, MD, FRCPC, Clinical Instructor, Division of Endocrinology, University of British Columbia.
